

School of Arts & Sciences

STUDY WITH YOUR PEERS WITHOUT ANY PRESSURE.

Learn with other students and prepare for exams through Peer Led Study Groups (PLSGs).

What are PLSGs?

- Student-centered and managed groups available for undergraduates taking intro **Biology**, **Chemistry** and **Physics** classes
- Smaller group sessions facilitated by undergraduate peer leaders that enable students to have in-depth discussions about problems from class, main concepts, and study strategies
- Voluntary meetings that enhance individual comprehension through group interaction

And if you've already taken an intro biology, chemistry, or physics class and did well, consider becoming a peer leader.
